## **Congratulations letter to 2016 World Green Design Forum Brussels Summit**

I would like to express my most sincere congratulations to the upcoming World Green Design Forum to be held in Brussels on October 13-14, 2016.

I am glad to see how strongly WGDO is committed to enhance a sustainable development model, helping identifying tools and methodologies for countries and the business community in order to get to a more affective approach to a "Green World", promoting green design, in order to reduce waste and pollution since the very beginning of the production chain.

I am confident that "Green Design" will play a more and more important role in the future, on the way of sustainable development.

As a President of Italy-China Friendship Association, I wholeheartedly support this initiative, which will gather many dignitaries and international players to discuss such a fundamental issue.

Taking this opportunity, I hope Italian delegates can share and fruitfully communicate their experiences, and the cooperation between Italy and China in design and green design will be deeper and deeper in the future.

My best regards

*Irene Pivetti  
President of Italy-China Friendship Association*
